In all very satisfied. However, my attempts to put the tape with bubbles were terrible. I think you with these fabulous vans and fresh bike racks convinced me to fat for the plenary in VW bike for my camper when it finished. Make sure it's a dry day, everywhere the tape plays rinsing with Meths. I fired a barn bike rack a few months ago, but instead of putting them on the van, put them to the real hook group that will play the van. Cool, thank you all. What do you want? If it was not for the dish in a rich, I think I was looking at my van, is it a CMC-Reimo Conversion? The lower part is well above the Badge of the Volkswagen / Roundrel. A: 7E0 071 104 A (officially now for briefing door) - This is the oldest design (more flat) with rim below the emblem / Roundrel Volkswagen and near the numbers plate (just above it). Its 204 mm of the brake light edge. Before installing, check the gap between the rear and rear lights and correct, if necessary: - , from 2016 VW T6 Caravelle, from 2016 VW T6 Multivan, since 2016 VW T6 Transporter, from 2016 good news !! This bicycle rack arrives - Mounted - a great economy :) FAQ q: Bicycle rack is what? One thing that made me erect were the bars that connect the bikes were attached to the rack around the wrong way (the adjustable clip was on the bicycle frame instead of on the hanging side ready to attach the a bicycle, changed ) Date as they are expensive, I would like to wait for a cover for the two corners to cover some of the black plastics and screws to give a but it is a bike rack after all.. just fitted my VW bike rack, sourced from Banwy in their Black Friday deal. Still loving the Acapulco blue too... If it wasn't for the number plate I would think I was looking at my van, is it a CMC -Reimo conversion? A great design and worthwhile bit of kit, its 204mm from the edge of the brake light. If the tape is warm it will be easier to use ( I know November may be a little difficult!). I use a chinograph to mark the centre point on the tailgate between the hinges and measure the distance between the brackets on the rack and use the mark to centre the measurement allowing a couple mm for the overhang of the sticky pads Does this photo help If your unsure, just hang it on without tightening up, obviously pop something on to protect the paint and just mark it up, take it off again and then apply your protective strip, they arnt heavy I managed mine myself. Could it be indicating 204mm from the hinge? DoneÁÁÁt wear nitrile or latex gloves as you will end up sticking to the tape, have a stiff plastic squeegee to push any bubbles out... The attached instruction shows that the top stickers should be 204mm from something. The VW Genuine bike carrier is made of anodised aluminum and comes pre-assembledÁ Áand so can be easily mounted on the vehicle. Can't fathom where I should measure from. Thanks to the sliding bicycle rails and the one-hand removable mounting arms, it is easy to load the carrier with up to 4 bicycles. Thanks @Markymark , the conversion was done locally at MAL VW, still really happy with the van and the conversion, even more that the leaky side window has been fixed! Reimo roof, with the rest being MALÁÁÁs design. A: YES My dealer fitted my rack and I'm pretty sure they did get a four year old to put them on. I have seen stickers on the back of some CaliÁÁÁs that looked like a four year old had put them on.
